

Civil and military authorities

Improving performance and safety

- Structuring organisations,
- Strengthen oversight,
- Optimising the use of resources,
- Controlling your service providers, suppliers and MRO's,
- Achieving the expected transformations and changes,
- Improving the qualification of staff,
- Comply with international civil or military aviation regulations,
- Maintain aircraft airworthiness,
- Protecting data and ensuring cybersecurity.

In all areas of aviation

- Initial airworthiness,
- Airworthiness monitoring,
- Product certification,
- Ensuring aircraft airworthiness continuity (NAV),
- Aircraft Operations (OPS),
- Aerodromes and ground supports (AGA),
- Staff licensing & training (ELP),
- National Security Plan (SSP),
- Risk-based Oversight (RBO),
- Safety Management Systems (SMS).

International civil and military aviation standards

- ICAO Standards,
- European Aviation Safety Agency (EASA) regulations,
- European Defence Agency's EMAR (European Military Airworthiness Requirements) framework and its national variations for military aviation,
- National regulations,
- Safety benchmarks,
- IATA and ICAO Dangerous Goods Standards.

Enhancing the performance of your organisation

Do you want to commit to a Quality approach or enhance the one already in place? Does your client require proof of your commitment to the quality of the services you provide? Improve your performance and competitiveness by obtaining certification for your organisation in accordance with ISO 9001, ISO 14000, ISO 50001, ISO 26000, ISO 27000, ISO 55001, EN 9100, EN 9110 or EN 9120 standards.

OSAC, a subsidiary of the Apave group, is authorised by ministerial decree to carry out inspection missions for aviation safety. As part of the Authority, OSAC issues, monitors, suspends or cancels approvals of production, maintenance, continuing airworthiness management and maintenance training organisations, aircraft airworthiness documents and aircraft mechanic's licences.

The Apave teams offer comprehensive support to meet all the needs of civil and military authorities

Technical support

- Implementation of new baselines,
- Drafting of the associated technical documentation,
- Support in organisation, tools & methods improvement,
- Change management,
- Diagnosis, analysis report, action plan,
- Audit and advice on data protection and cybersecurity.

Data Protection and Cybersecurity

- Integration of the new information security regulations (Part-IS),
- Consulting, auditing, training, crisis management and certification support,
- Evaluation and labelling of your suppliers and service providers in the field of cybersecurity,
- GDPR assessment, organisation and compliance.

Innovative tools for aviation safety

- Risk Based Oversight (RBO): the offer digital PREDICT Risk Monitoring® system risk mapping based on the DataScience, and, as part of a Risk Based Oversight/ Inspection approach, allows the frequency and nature of monitoring to be modulated according to risk scoring (SixFoisSept),
- Use of connected glasses to conduct remote audits.

Team strengthening

Secondment of Apave experts to your teams to strengthen your organisation and support your activity.

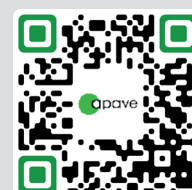

Promoting and optimising aviation safety

- Strengthening the safety level of aircraft operations (OSAC and Apave Aeroservices),
- Lightning risk prevention, GVT (Ground Vibration Testing) modal analysis (Sopemea),
- Radio support for navigation, approach and landing (Eurocontrol subsidiary).

OSAC has been authorised since 2010 by ministerial decree to carry out control missions in the field of aviation safety and issues organisation approvals and aircraft airworthiness documents.

Staff training

- Regulatory, technical and practical training courses, with content tailored to your needs and delivered either face-to-face in the field, remotely with a trainer or through a MOOC (Massive Open Online Course),
- Cyber security and data protection training including crisis staff management.

Our strengths

Why choose Apave?

- + A native knowledge of the civil and military aeronautical sector for over 80 years
- + A range of regulatory and technical training courses specific to the aeronautical sector
- + Advanced expertise in the aviation sector through our subsidiaries Apave Aeroservices, Apave Digital, Camas, BVT, Eurocontrol Spain, Oppida, OSAC, SixFoisSept, Sopemea
