

Consulting and technical support

Performance through the management
of human, technical, environmental
and economic risks

BUSINESS ACTIVITIES

Supporting the success of your projects by developing your performance while managing your risks

Your challenges

Your business has to meet performance and safety criteria, but also the new environmental and technological challenges as well as those linked to work organisation: transition to low-carbon, industry 4.0, remote working, flexoffice.

A targeted or comprehensive response, built jointly with you

We support the success of your projects by acting on three core factors: Human, Organisational and Technical (HOT).

We offer you support and solutions that are adapted to your needs and context:

- We evaluate and offer
- You decide
- We act together

Support in line with your expectations

- Help with steering, mediation
- Diagnostics, audits, recommendations
- Provision of expertise and methodologies
- Upskilling
- Back-up resources
- Online services and digital tools
- Studies, tools and analytical resources & measurements

Environmental impact management

We help you to integrate regulatory requirements and meet the new energy and environmental challenges.

- Energy conservation, reduction of carbon footprint and natural resources: management of energy, audits and inspection of facilities classified for environmental protection (ICPE), greenhouse gas emissions audit, carbon audit, energy efficiency, etc.
- Reducing your environmental impact and meeting societal requirements: protection of biodiversity, circular economy, polluted sites and soils audits, environmental management, CSR, etc.

Improve the health and safety of the public and of workers

Helping you with health and safety performance:

- Changing your health/safety culture: audit, operational support, training, health and safety activities (safety days, talks, board games...).
- Improving the health and quality of life at work of your employees: psychosocial risk, ergonomics, musculo-skeletal conditions, quality of life and working conditions, etc.
- Improving the performance of your risk management tools: DU, external businesses, hazardous goods transportation (HGT), LOTO, ATEX, fire, etc.
- Implementation of operational and effective management systems: MASE, ISO 45001 certification, management of site risks on new works or process works operations, etc.

Manage and improve the performance of your workforce and organisation

Our sustainable performance approach combines risk management and quality-cost-deadline performance. Our support targets the core of your operations (production, maintenance, quality, R&D, etc.).

- Advice on workforce and activities management, governance and change management support
- Development of skills and work-station performance
- Performance and resilience of organisations and processes, management systems
- Trouble-shooting, progress areas and continuous improvement

Assuring the performance, safety and longevity of your procedures, equipment, utilities and installations

We are at your side throughout the lifecycle for comprehensive risk management:

- Multi-directive compliance
- QHSSE risks
- Operating losses or loss of asset value

Increased confidence in your existing systems and development projects:

- Assistance with project management for the success of industrial projects (from needs analysis to sign-off on performance)
- Reliability, safety and availability approach (operating safety – FMDS – TPM - supervision)
- Technical health assessment, prolongation of working life, total cost control
- Improving yield and cost price
- Improving performance of maintenance

Optimisation of compliance and technical risk management costs.

The Apave Group in brief

Our job is to enable our customers to carry theirs out in total safety.

Apave is an international group specialising in risk management with more than 150 years' experience.

Our 12,650 employees work at the request of our customers, on regulatory or non-regulatory assignments related to risk management. Apave offers services and expertise in 5 areas: Inspection, Training, Testing & Measurements, Certification and Labelling, Consulting and Technical Support. Whether for individual safety, site safety and compliance, environmental safety or digital security, Apave continues to fulfil its purpose as a trusted third party to its customers.

“Acting as trusted partner to make the world safer, more sustainable and a source of shared progress” is Apave’s corporate purpose.

Inspection

Testing and measurements

Certification and labelling

Training

Consulting and technical support

Why choose Apave?

Our added value is built on:

- Pragmatic actions that take into account your operational realities on the ground: no copy/paste solutions, but rather, customised operational implementation!
- Capitalising on best practices and experience.
- A multidisciplinary approach to the subjects and issues addressed thanks to our network of engineers, prevention officers, ergonomics specialists, occupational psychologists, management and organisational consultants and ecologists, etc.
- Operating in project mode, with a single contact person to steer your project and a dedicated team for operational interventions.
- 30 years of experience in the consultancy business and 150 years of expertise in risk management.
- High-level technical expertise in each field.
- A comprehensive approach to your projects: assessments, analyses, support, training, teaching, digitisation, communications tools, etc.
- Day-to-day synergies with the various Apave areas: testing & measurements, certification and labelling, training and inspection.
- A unique local network that boosts the responsiveness of our interventions.
